COMPANION TO THE RECORD ALBUM "PACIFIC RIM DULCIMER PROJECT"

The tab shows the original tuning used on the record. However, you will have to adjust your tuning somewhat sharp or flat from concert pitch in order to play along in tune with the record. (For example, all cuts showing dd-A-D tuning will not be in exactly that pitch on the play back - some may be actually c#c#-G#-C# or d#d#-A#-D# or thereabouts)

To simplify following the playing sequence of the tablature, we have labeled the "parts" of the recorded performance as they occur on the album. This is done either in association with the additional verses, or by just listing the "SEQUENCE".
